MOHIT AGARWAL

SENIOR WORDPRESS ENGINEER · MODERN PHP & GUTENBERG (REACT.JS) · PERFORMANCE AT SCALE

Remote · Worldwide (Open to Contract) | 6375641312 | mohitagr251097@gmail.com | github.com/Mohitx345 | baymediasoft.com

PROFESSIONAL SUMMARY

Senior WordPress Engineer with 5+ years architecting and defining the back-end technical vision for enterprise-level WordPress solutions, using modern PHP and custom Gutenberg blocks built in React.js. Has shipped and maintained high-traffic platforms serving millions of visitors, including a regulated, high-visibility enterprise academic institution site and a multi-branch healthcare network spanning dozens of locations. Solves complex performance and caching challenges to keep large-scale sites fast and resilient, and has led sprint planning, expert code reviews, and hands-on mentoring across a development team — establishing reusable patterns and best practices that were adopted team-wide and measurably cut production time. Comfortable acting as a strategic technical partner to clients — translating business requirements into architecture decisions and long-term technical strategy — and maintains a public GitHub with real, production-grade WordPress and PHP code reflecting this work firsthand.

Drawn to Fueled's mission of architecting the foundational systems behind large-scale digital experiences for globally recognized brands, and excited to bring deep WordPress architecture expertise to a distributed, contract-based engineering team.

WHY I'M A STRONG FIT FOR THIS ROLE

- **Modern PHP & Gutenberg Architecture —** Deep, hands-on experience with modern PHP and building sophisticated custom Gutenberg blocks in React.js, beyond core blocks or ACF-only implementations.
- **Back-End Technical Vision & Strategy —** Defines the back-end technical vision for large-scale projects, making critical architecture, performance, and scalability decisions that set the foundation for long-term success.
- **Enterprise-Scale, High-Traffic Systems —** Has architected and maintained WordPress platforms serving millions of visitors, including a regulated academic institution site and a multi-branch healthcare network across dozens of locations.
- **Performance & Caching at Scale —** Solves complex performance and caching challenges, turning slow or brittle systems into fast, resilient platforms under real production load.
- **Technical Leadership & Code Quality —** Led sprint planning and code reviews as team lead, championing code quality, security, and maintainability — mentoring developers directly through code, and establishing reusable patterns and best practices that were adopted team-wide, cutting production time by ~25%.
- **Proof, Not Just Claims —** Maintains a public GitHub populated with real, production-grade WordPress and PHP code — no whiteboard test needed to see the craft firsthand.
- **Strategic Client Partner —** Comfortable leading technical discussions directly with clients, translating business needs into architecture decisions and long-term technical strategy.
- **Full Development Lifecycle —** Extensive Git workflow experience, from architecture and implementation through debugging, optimization, and production release management.

CORE SKILLS & KEYWORDS

Architecture & Core	Modern PHP · WordPress Architecture · Custom Plugin & Theme Development · Enterprise-Level WordPress Solutions · Scalable System Design
Gutenberg & Front-End	Custom Gutenberg Block Development (React.js) · Gutenberg Ecosystem · JavaScript (ES6+) · HTML5 · CSS3 · Responsive & Accessible Design
Performance & Scale	Performance Optimization · Caching Strategy (Object & Page-Level) · Core Web Vitals · High-Traffic / Millions-of-Visitors Platforms · Cloudflare & CDN
Technical Leadership	Code Reviews · Mentoring · Development Standards & Best Practices · Sprint Planning · Team Leadership
Integrations & APIs	REST API Development · Webhooks · CRM & Third-Party Integrations · MySQL · Database Optimization
Process & Delivery	Git / Version Control Workflows · Public GitHub Portfolio · Client-Facing Technical Strategy · Documentation & Architecture Records

PROFESSIONAL EXPERIENCE

Senior WordPress Developer · **ITR Consulting** *Aug 2025 – Present | USA · Remote*

- Architect and build custom WordPress plugins, custom post type structures, and Gutenberg block components using modern PHP and React.js, aligned with enterprise-level performance and security standards.
- Solve performance and caching challenges across client sites, implementing Cloudflare-based CDN, security hardening, and uptime monitoring for high-availability platforms.
- Build and manage REST API integrations and automation workflows, connecting WordPress to CRM platforms and third-party systems via webhooks and custom endpoints.
- Act as technical point of contact for client stakeholders, translating business requirements into architecture and implementation decisions.
- Create and maintain technical documentation and architecture records to support long-term maintainability and team handoffs.

Senior WordPress Developer / Team Lead · **PRP Webs** *Mar 2021 – Mar 2025 | India*

- Led full-stack architecture and development across 10+ concurrent enterprise and high-traffic client sites, building custom plugins, hooks-based systems, and Gutenberg-based content architecture using modern PHP.
- Owned performance optimization and caching strategy across client properties, working within Cloudflare-managed infrastructure to keep high-traffic sites fast and resilient under load.
- Led sprint planning and conducted code reviews across the development team, establishing development standards and reusable component patterns that reduced production time by ~25% and were adopted team-wide.
- Mentored junior developers through code review and pairing, raising the overall quality bar for security, maintainability, and architectural consistency.
- Managed Cloudflare configuration and ongoing security hardening for all client properties, enforcing best practices including access controls and vulnerability monitoring.
- Served as the direct technical liaison to clients, including healthcare-adjacent and B2B accounts, translating business goals into technical roadmaps and architecture decisions.

NOTABLE PROJECTS — AT SCALE

- **MBZUAI Academic Platform — mbzuai.ac.ae —** Architected and maintained a high-traffic, millions-of-visitors enterprise WordPress platform for an international academic institution — custom plugin and block development, API integrations, Cloudflare security, and performance optimization in a regulated, high-visibility environment.
- **Aster Clinic — asterclinic.ae —** Built and maintain the WordPress architecture for a large, multi-branch healthcare group spanning dozens of locations across the UAE — scalable page templates, doctor profiles, and service architecture supporting high visitor volume.
- **Baymediasoft — baymediasoft.com —** Built and manage a full WordPress agency platform end-to-end — custom plugin and Gutenberg block development, REST API integrations, and ongoing performance and security maintenance.
- **GitHub Portfolio — github.com/Mohitx345 —** Public repositories containing real, production-grade WordPress and PHP code reflecting the architecture and engineering practices described above.

EDUCATION & CERTIFICATIONS

- B.Tech in Computer Science — Rajasthan Technical University, India
- Certified: WordPress Development & Customisation
- Certified: Web Performance Optimisation & SEO
